2002

Windows 95/98: Start at Step 1
Windows 2000: Start at Step 5

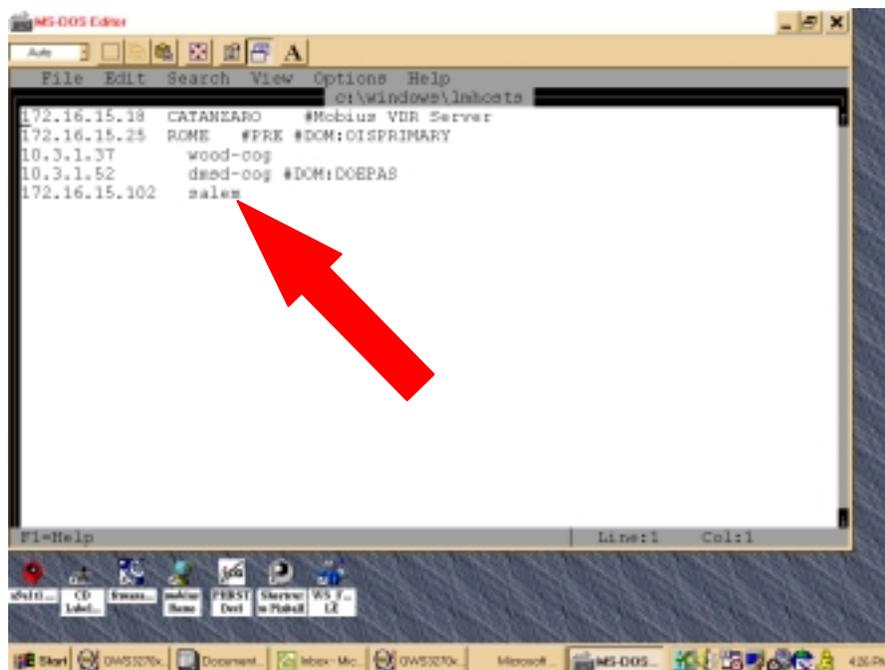

1. From the **R**un menu command,
enter **EDIT C:\WINDOWS\LMHOSTS** in the **O**pen box
and click **OK**.

2. The EDIT program window will open. Enter the IP address and server name as shown below.

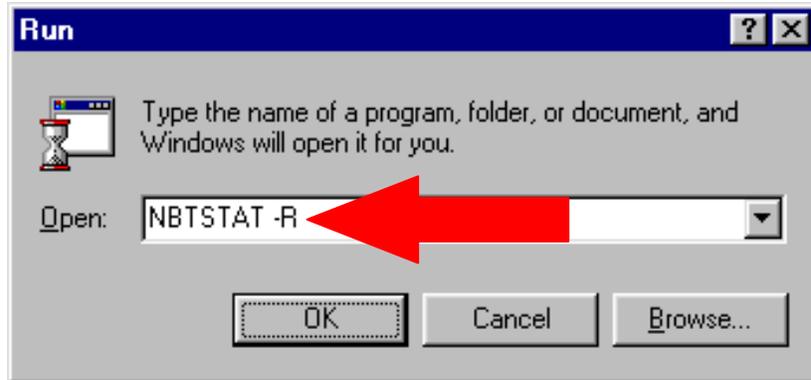

Note: the "lmhosts" file may already exist, if so, just add the information to the bottom of the file.

Save and exit the edit program

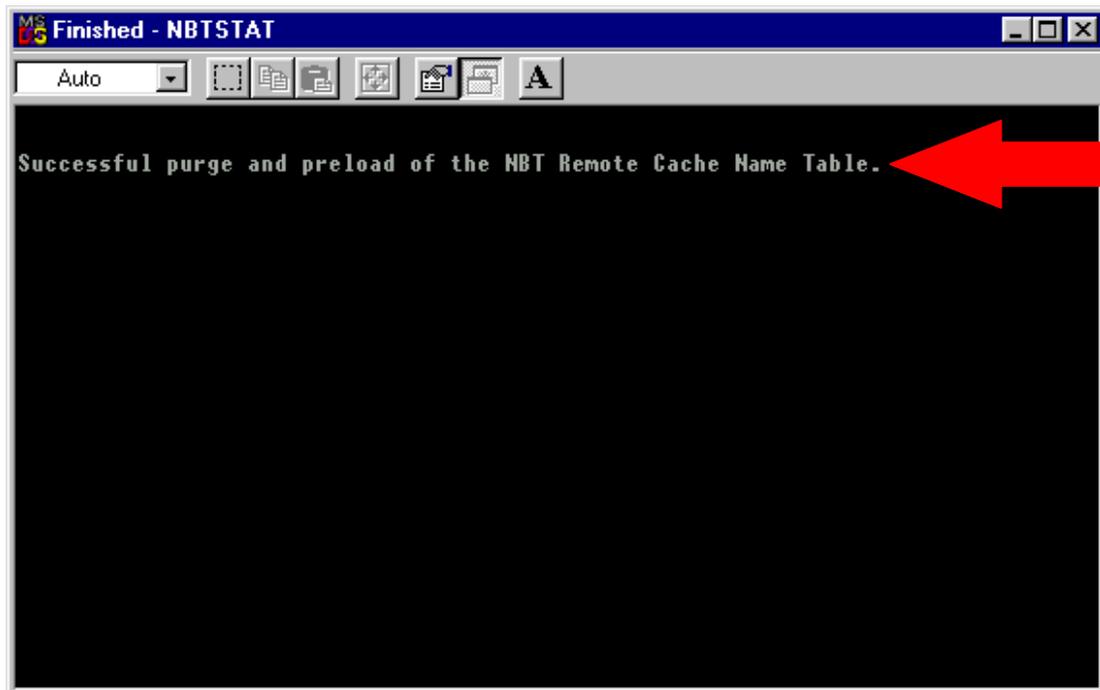

- From the **Run** utility enter **nbtstat -R** and click **OK**.

Note: the -R option on the nbtstat command must be an upper case letter.

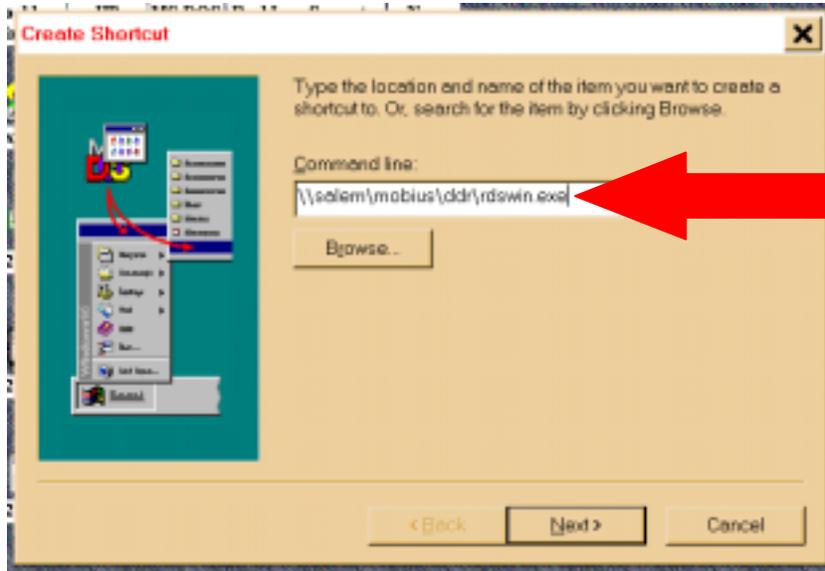

- You should see the following results from the previous step.

If not, redo steps 1, 2 and 3 again. If that fails, contact your PC/Network administrator. Close the NBTSTAT window.

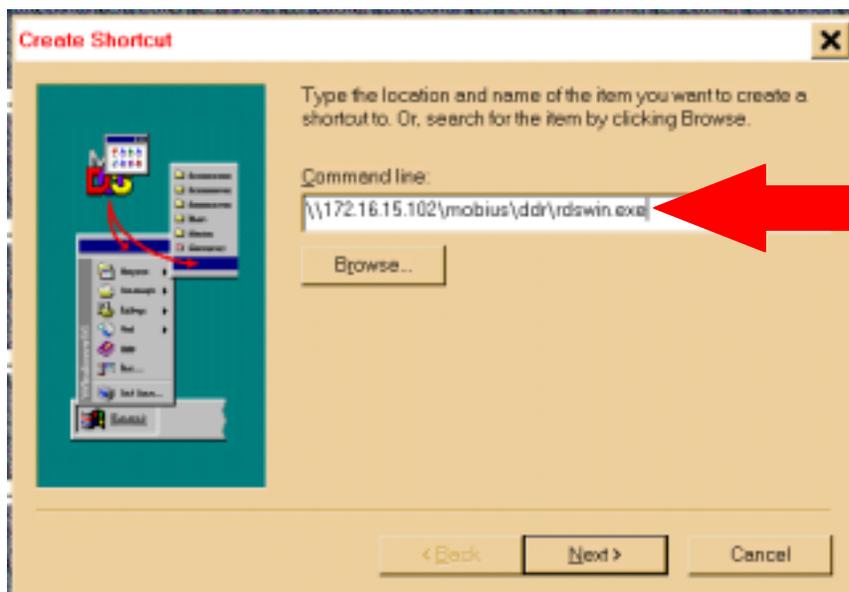

5. Create a shortcut on your desktop as shown below.

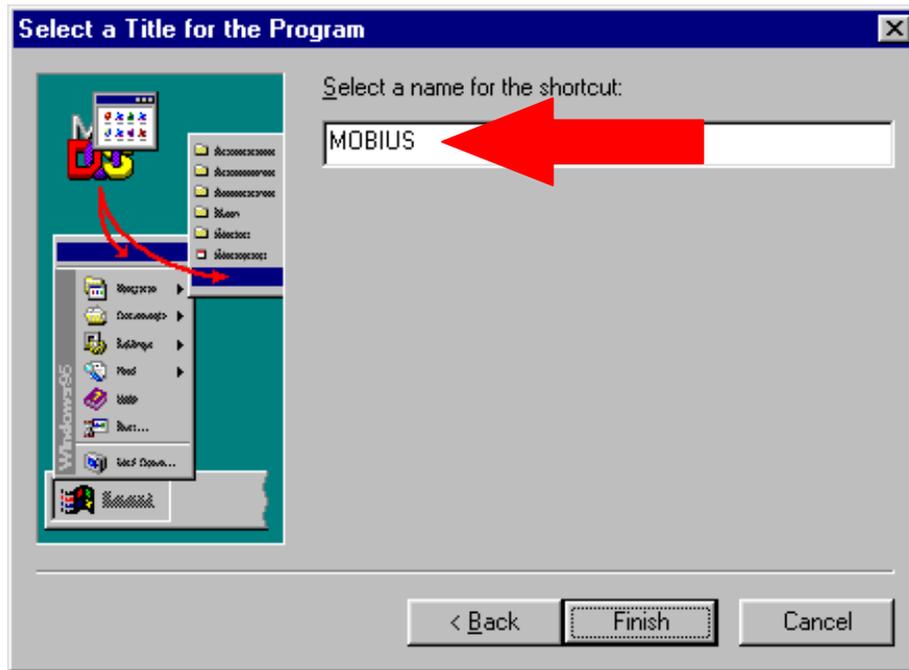

Windows 95/98

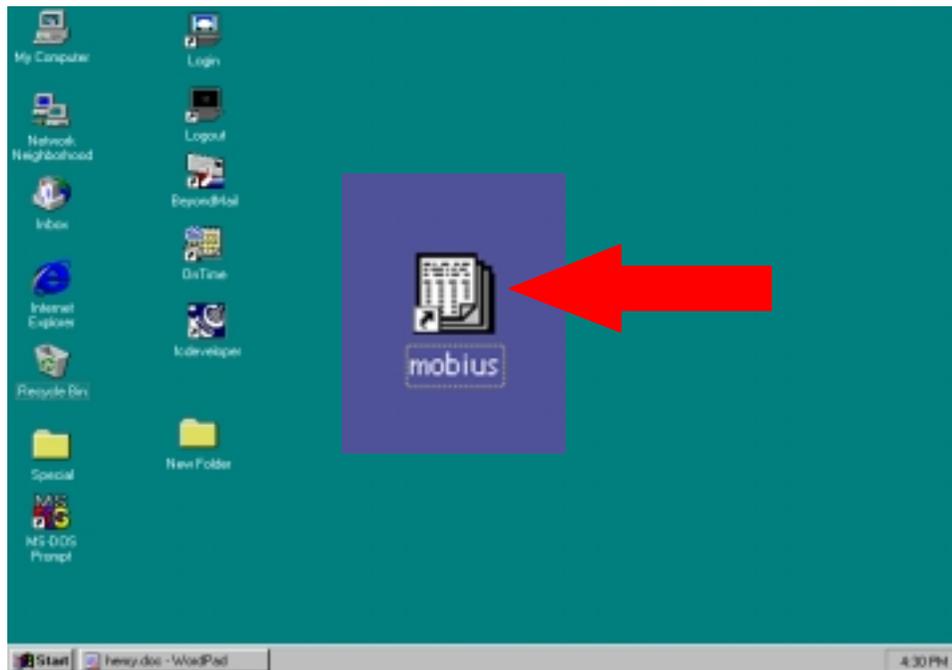

Windows 2000

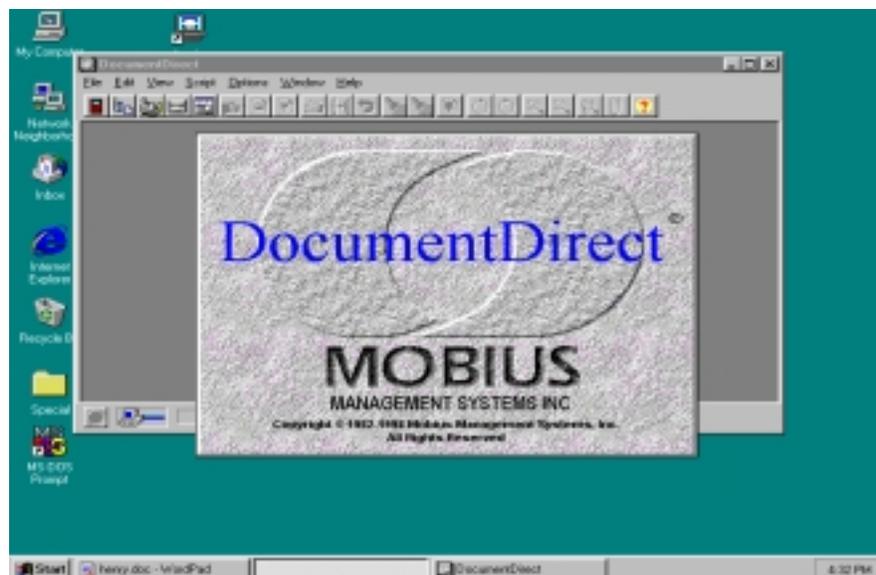

6. Enter the name of the ICON.

7. If the shortcut is successful, an ICON as seen below will appear on your screen.

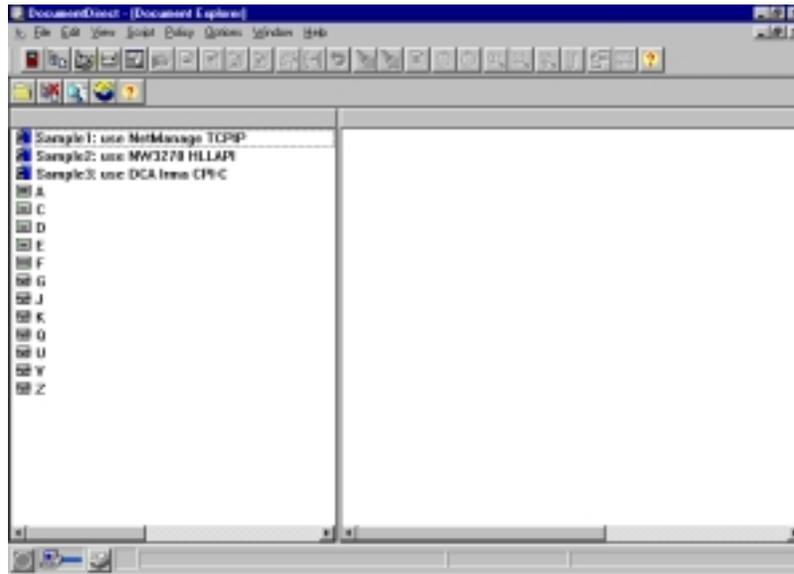

8. Double click the “Mobius” icon. The Document/Direct program should begin and a screen similar to the one below will appear.

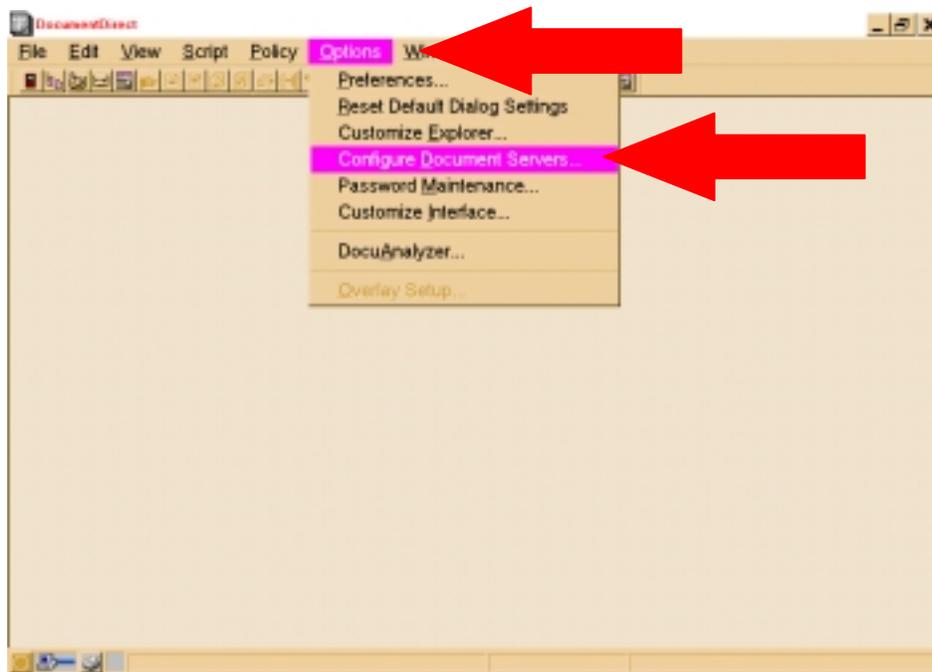

9. Installation is now complete

Configuring the Document Server

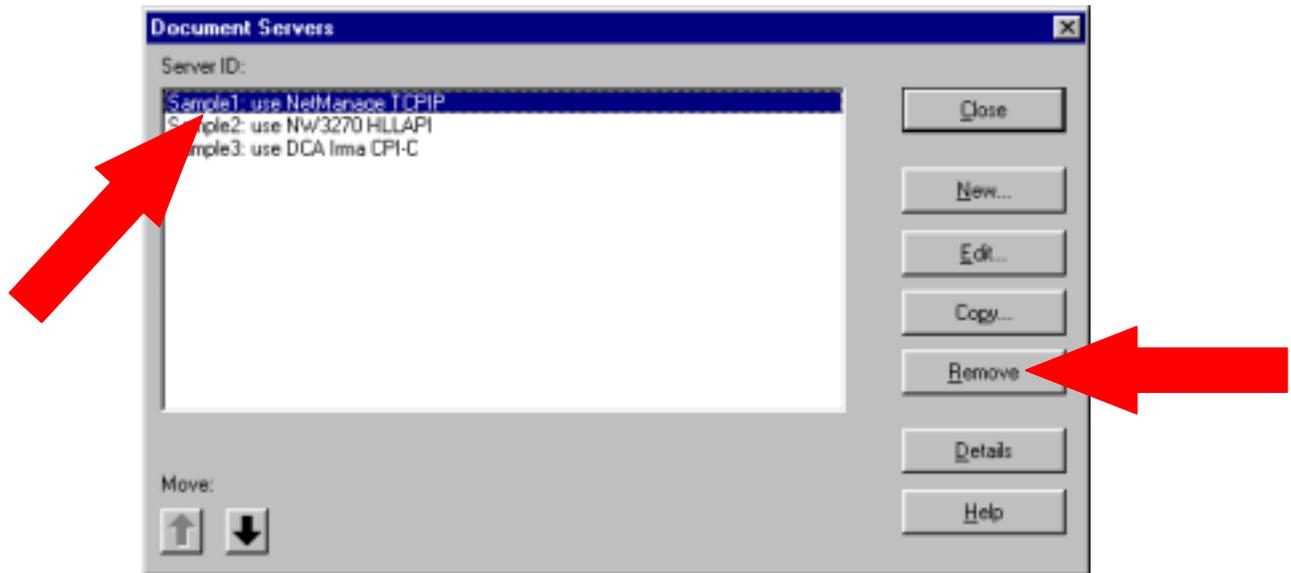

When you open Document Explorer and Mainframe Reports does not appear, perform the following steps to correctly add the server.

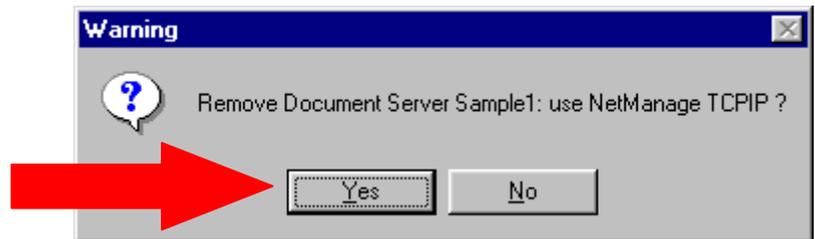

1. Click on **Options** and select **Configure Documents Servers**.

- Remove the three sample document servers by selecting the sample document server, then click **Remove**.

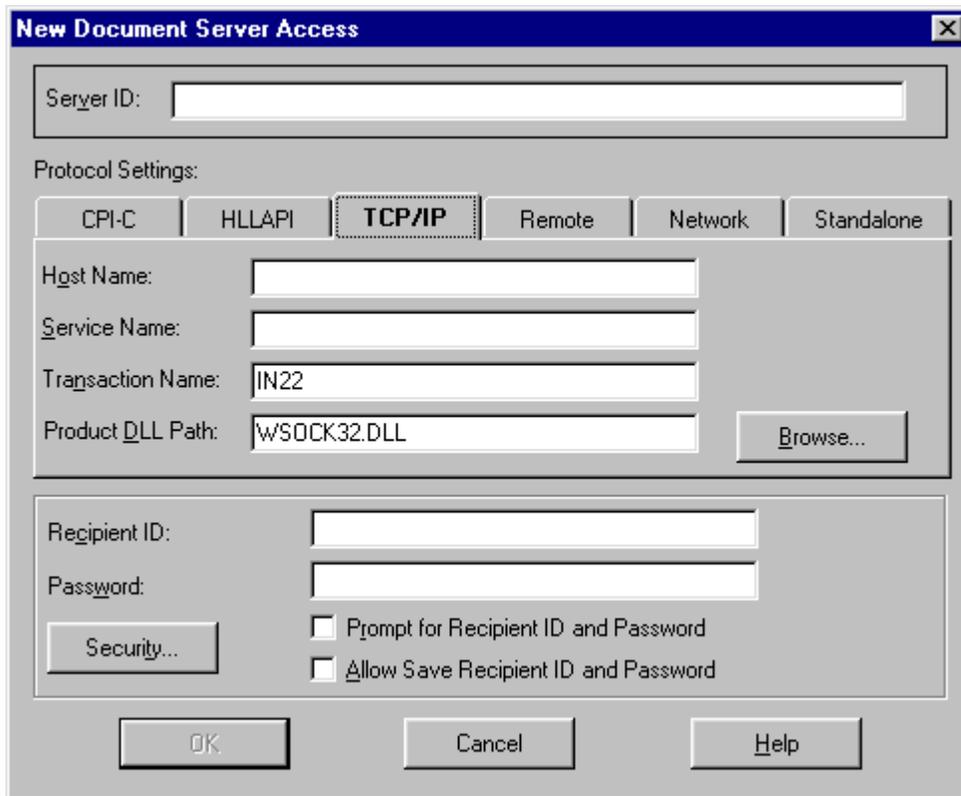

Click **Yes**

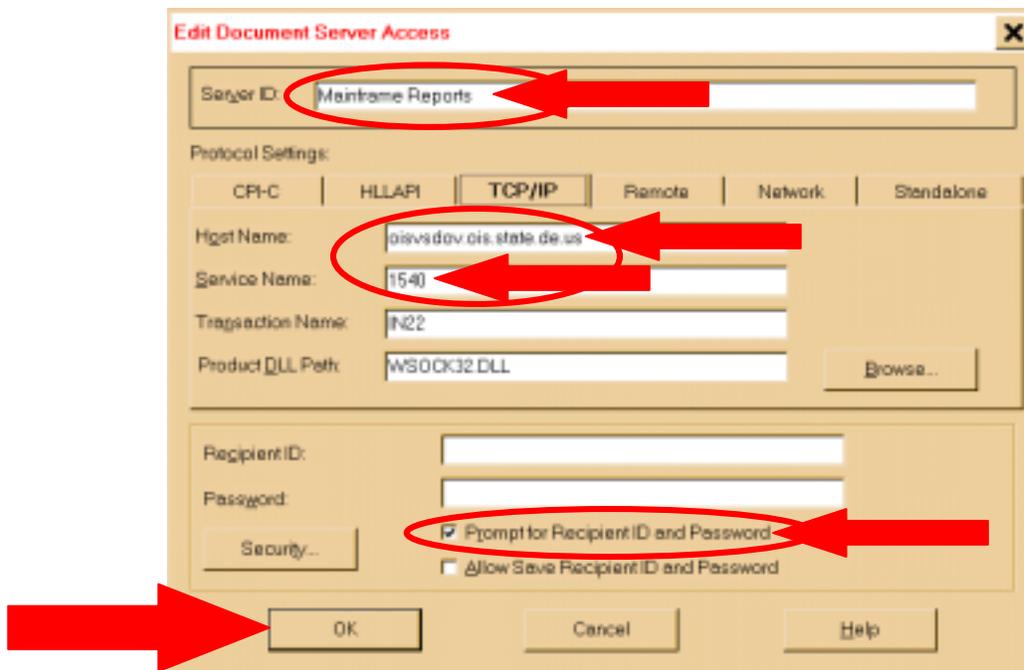

- After you remove the three sample servers, click on **New** to get the New Document Server Access screen.

4. Type or select the following indicated information.

Click **OK**. Return to Document Explorer and Mainframe Reports will now be available.
